

GARLIC (QUICK-SOL) APPLICATION SHEET

| | |
|--------|---------|
| Name | Variety |
| GARLIC | |

| | | |
|-------------|-----------------------|------------------------|
| Quick-Sol | Dosage * | Stage of Culture/Usage |
| qwdqw dqwdq | 6 to 7 fl. oz. / acre | Every 30 Days |

APPLICATION PROCEDURE:

- Rinse the equipment to be used before and after application
- * Quick-Sol should be diluted in the typical amount of water used per acre.
- Quick-Sol should be diluted in drinkable, clean water at least 1 hour before being applied.
- For better results, apply during the early morning or late afternoon hours.
- Quick-Sol should NOT be applied simultaneously, or mixed with fertilizers, fungicides, insecticides, or any other type of agricultural product.
- When applying fertilizers, apply Quick-Sol 48 to 72 hours before applying the fertilizer. When pruning takes place an application of Quick-Sol should follow for increased benefits.
- The solution of Quick-Sol in water should be used within 72 hours once diluted.
- Do not return diluted material to the main Quick-Sol container.

Always try Quick-Sol first in a small area.
Read the label instructions in a Quick-Sol container before use.
 Foliar and soil application is strongly recommended or, in lack of this, foliar application should be abundant enough that the product reaches the soils.
